NEPAS

NEPAS business

Our ambition is to help clients in public and private sector to create new business opportunities by improving energy performance through energy management projects.

Our key competence is to provide professional assistance in developing innovative projects, seeking financial support and managing the implementation of the projects.

NEPAS products and services

Our products and services are under the umbrella **energy management**, and include:

- Energy- and climate project development
- Fundraising from public grants
- Project management services
- Training courses and higher education

NEPAS clients

Our clients have a common objective to contribute to energy performance improvement, and are mainly from the following sectors:

- Public grant schemes
- Energy sector
- Municipalities
- Educational institutions
